Plan a realistic week

Start with your classes and deadlines.

Choose the most important tasks for this week.

Leave room for rest and unexpected changes.

Make tasks specific

Break a large assignment into smaller steps.

Replace study science with review one chapter.

Estimate how long each step might take.

Protect focused time

Choose a place with fewer distractions.

Put one task in each study block.

Take a break when attention starts to fade.

Check your understanding

Explain a concept in your own words.

Try a question before checking the answer.

Write down what you need to revisit.

Review and adjust

Compare your plan with what you completed.

Move unfinished work into realistic time slots.

Keep the habits that helped you focus.
